

SINERGIA 3.0 / INDOOR TECHNICAL RIDER

Stage

- Optimum: 10 meters width by 10 meters depth by 6 meters height.
- Minimum: 8 meters width by 7 meters depth by 4,5 meters height (for adaptations below the minimum, please contact)

Floor

- Black Linoleum in all the acting area.
- Level floor (inform if the floor is irregular or uneven).
- It is optimal for the show that the audience can see the floor.

Theatrical draperies

- Black backdrop.
- Without legs
- Without borders

Sound

- PA enough for the auditorium.
- 2 monitors on stage, one on the offstage right and the other in the offstage left.
- Sound desk.
- Wires needed to set the sound system.
- Minijack connection to plug the computer (where we take the sound from)

Lighting

- You can find attached the lighting plans of the show. We can make an adaptation when the technical rider of the venue is provided.
- Setting time: 8 hours. A setting schedule of the day will be done in agreement with the venue.
- Disassemble time: 2 hours

Dressing rooms

- Showers with hot water.
- 4 Towels
- Bottled water
